TRAINING OR RESEARCH ACTIVITY

My subjects of expertise are logic (mathematical, computational, and philosophical), computer mathematics, cognitive science, and philosophy of mind.
I focus on pure and applied logic. I am particularly interested in the mathematical/philosophical notion of logical consequence and its applications in (non-)classical computation.
More generally, I research into formal languages (especially logical languages) and their applications in human and artificial cognition.
I am also interested in knowledge representation and cognitive modeling, conceived both narrowly (symbolic & connectionist models) and broadly (e.g., mental representation [in, say, Aristotle]), and in unconscious cognition.

PROJECT ACTIVITY

Year	Project
2003-2006	Doctoral project in the philosophy of mind and its history. Phase 1 (Philosophy of mind): University of Nottingham, United Kingdom. Phase 2 (History of the philosophy of mind): University of Paris I – Panthéon-Sorbonne and University of Paris IV – Sorbonne, France.
2008-09	Postdoctoral project "The epistemic status of unconscious knowledge", University of Sussex, Dept. of Psychology and COGS, United Kingdom.
2009-2014	Postdoctoral project "Unconscious knowledge: Cognition, identity, action", University of Oporto, Institute of Philosophy, Portugal.
