2017/18	Merit Based Scholarship by Ca'Foscari University of Venice
2018(Jan-June)	Overseas Erasmus Study program scholarship with Bonus

TRAINING OR RESEARCH ACTIVITY

<p>description of activity: In my research activity with Prof. Carlo Giupponi, I have investigated Population distribution and water resources maps. Implementation has been performed by employing mapping algebraic approach in the context of Quantum Geographic Information system (QGIS). I made a detailed literature survey of existing techniques and discussed their relative merits and demerits. More particularly, classification, overlapping, clipping, masking and other GIS techniques have been applied with the help of raster and vector datasets to obtain the effective results.</p>
