Qualified as Associate Professor (Abilitazione Scientifica Nazionale - ASN) for the scientific classes 01/B1 (since 11/09/2019) and 09/H1 (since 16/01/2020)

### Summary

My main interests in research are related to Information Systems and their Energy Efficiency and Quality of Service. I research new strategies to improve the efficiency of data centers, clouds, and fog computing by applying techniques derived from the Artificial Intelligence and Machine Learning fields. I am very interested in adaptation and self-adaptation to discover how a complex system can heal itself when some problems occur. More specifically I have been working on energy efficiency and sustainability of cloud and fog applications, QoS-aware deployment in edge and fog computing, Data Quality in big data environments, Ambient Assisted Living, Smart Cities, and Smart Buildings.

Milan – 07/04/2020

## Academic Positions

- 03–2020/now **Researcher**, POLITECNICO DI MILANO, Milano, ITALY.  
Research in the field of Information Systems with a focus on adaptive systems, assessment and management of energy efficiency in applications, data quality in Big Data, and data management in hybrid and distributed environments, in collaboration with the Information Systems group.
- 02–2020/now **Visiting Senior Researcher**, UMEÅ UNIVERSITY (UMU), Umeå, SWEDEN.  
Research in the field of distributed systems and resource allocation in cloud and fog computing.
- 04–2019/01–  
2020 **Senior Lecturer**, UMEÅ UNIVERSITY (UMU), Umeå, SWEDEN.  
Research in the field of Cloud and Edge Computing within the Distributed System Group of the Computer Science Department.
- 01–2014/02–  
2020 **Research Assistant**, POLITECNICO DI MILANO, Milano, ITALY.  
Research in the field of Information Systems with a focus on adaptive systems, assessment and management of energy efficiency in applications, data quality in Big Data, and data management in hybrid and distributed environments, in collaboration with the Information Systems group.
- 01–2011/12–  
2013 **Ph.D. Candidate**, POLITECNICO DI MILANO, Milano, ITALY.  
Research in the field of adaptive systems for improving efficiency of applications in data centres using machine learning techniques.
- 07/2009–  
06/2010 **Research Assistant**, UNIVERSITÀ DEGLI STUDI DI PALERMO, Palermo, ITALY.  
Research in the field of robotics and artificial intelligence with a focus on imitation learning models.

---

## Education

- 2011–2013 **Ph.D in Information Technology (XXVI cycle)**, POLITECNICO DI MILANO, Milan, Graduation date: March 07, 2014.  
Thesis: “Measuring and Improving Energy Efficiency of a Data Center in a Self-Adaptive Context”, advisor Prof. Barbara Pernici.
- 09/2012–  
02/2013 **Visiting Student**, MASSACHUSETTS INSTITUTE OF TECHNOLOGY, Cambridge, USA, Supported by the Rocca Foundation scholarship.  
Study about machine learning techniques for Bayesian Networks automatic learning and probabilistic operator selection.
- 2006–2009 **Master of Science in Computer Science for Intelligent Systems (Laurea Specialistica in Ingegneria Informatica per i Sistemi Intelligenti)**, UNIVERSITÀ DEGLI STUDI DI PALERMO, Palermo, First-Class Honours (110/110 e Lode).  
Thesis: “Study of an Agent Model Based on the Genetic Metaphor”, advisor Prof. Salvatore Gaglio.
- 2003–2006 **Bachelor of Science in Computer Science (Laurea in Ingegneria Informatica)**, UNIVERSITÀ DEGLI STUDI DI PALERMO, Palermo, First-Class Honours (110/110 e Lode).  
Thesis: “Genetic Programming in Multi-Agent Systems: an Application”, advisor Prof. Salvatore Gaglio.

## Work Experience and Training

- 03-09/2008 **Software Developer**, S.I.R.I.O., Palermo, ITALY.  
Implementation of a wireless sensor network for vineyard and historical monuments monitoring related to two regional projects: *Virtus Vini* and *Geomon*
- 03-06/2008 **Intern**, NATIONAL RESEARCH COUNCIL (CNR), Palermo, ITALY.  
Research in self-organizing systems; development of a Jade/Prolog interface; development of a Jade based agent society in which individuals share Prolog knowledge
- 03-07/2006 **Intern**, NATIONAL RESEARCH COUNCIL (CNR), Palermo, ITALY.  
Research in multi-agent systems and genetic programming: development of a Java/Jade application using genetic programming techniques in agent systems

---

## Current research focus

The main focus of my research is on adaptive applications in distributed environments. The main goal is to improve the behaviour of applications running in a cloud environment by getting advantage on the information provided by the monitoring system. Using goal based models it is possible to automatically build an adaptive decision system able to manage the application according to the different goals of the application owner and/or of the cloud provider. Possible goals that have been investigated are performance of the application and of the cloud environment, energy efficiency and sustainability of the applications, security constraints. Recently I am also investigating implications in edge and fog computing and serverless applications based on the Function as a Service paradigm. Machine learning techniques such as reinforcement learning, Bayesian networks, and self-adaptation have been employed and adapted to my research. In my research I am connecting these two topics (Adaptive Information Systems and Artificial Intelligence) to create an adaptive system for managing applications in a dynamic environment.

**Green IT and Green Cloud** I have been working on managing energy efficiency and sustainability of applications and services. I propose an adaptive and dynamic sensitive approach which takes into consideration the behaviour of the application in a dynamic environment. The method detects undesired situation from the data collected by the monitoring system and selects proper repair actions using a continuous refinement process for learning and updating the knowledge about the effect of actions over the monitored variables.

**Metrics and Monitoring** My research focuses on selecting and defining metrics for describing the application in terms of energy efficiency and sustainability, performance, quality of service, and quality of data. I am investigating hidden relations between metrics. The knowledge of these relations enables a deeper understanding of the application and of the environment in which it has been deployed. I am also investigating techniques for reducing the amount of data to be monitored, with a focus on IoT generated data, studying distributed techniques for collecting and analysing data in order to reduce the time and cost for storing and analysing monitoring data.

Milan – 07/04/2020

☎ (+39) 02 23993424 • ✉ [monica.vitali@polimi.it](mailto:monica.vitali@polimi.it)  
📄 [vitali.faculty.polimi.it](http://vitali.faculty.polimi.it)

3/14

- Adaptive Systems** In my research I am proposing adaptive algorithms and techniques for reducing energy consumption of applications and maintaining their quality of service. The algorithms are based on the informed selection of a repair strategy from a set of available strategies. The selection is based on the learned and continuously updated knowledge about the ability of the action of fixing or mitigating the observed inefficiency.
- Big Data Quality** The quality of the information extracted by the analysis of big data depends on the quality of these data. In order to avoid unreliable results, this quality needs to be assessed. Even if data quality is an old and very consolidated topic, when dealing with big data new metrics and new techniques need to be defined and investigated. In my research I propose an updated set of metrics, defined for a big data context, and a framework for a context-aware assessment of data quality.
- DaaS in Heterogeneous Edge/Cloud Environments** Edge computing is affecting the cloud computing paradigm by allowing the execution of applications in a location nearer to the user, improving performance and security of the application execution. Data as a Service (DaaS) requires making shared data sources available for applications running in the cloud and in the edge with the highest possible utility, defined as both quality of service in providing data when requested and quality of data in selecting the data source which better match the application needs. The proposed DaaS approach provides a support in the selection of the most appropriate data source according to the customer requirements and manages data movement in cloud and edge to optimize the data access.
- Adaptive Ambient Assisted Living** Ambient assisted living aims at providing an adaptive environment in order to assist elderly and non self-sufficient subjects. This kind of systems requires the employment of a set of sensors and a monitoring system to detect interesting events occurring in the observed environment. The aim of the research consists in providing mechanisms for efficiently collecting and analysing relevant events. The elaboration of data coupled with the knowledge of the habits of the observed individuals can be the trigger for a set of adaptation actions allowing the management of both emergencies and daily activities. Machine learning techniques are employed to associate adaptation actions to the detected events, in order to better fit the specific individual life-style and to adapt to the modifications of his habits.

## Research Activities

### Participation in International Research Projects

01/2017–12/2019 **DITAS**, *Data-intensive application Improvement by moving daTA and computation in mixed cloud/fog environment*S, H2020 European Project, <http://www.ditas-project.eu>.

**ROLE: Task Leader.** Design a framework to overcome the barriers that hamper the adoption of Cloud Computing and increase the adoption of Fog computing by exploiting the full potential of these two paradigms in a synergic way. Support the development and execution of data-intensive application that are crucial for organizations and companies that want to manage their data in an efficient, reliable, scalable, and secure manner.

📄 [vitali.faculty.polimi.it](http://vitali.faculty.polimi.it)

4/14

- 01/2016–12/2017 **EU-BRA BigSEA**, *Europe-Brazil Collaboration of BIG Data Scientific Research through Cloud-Centric Applications*, H2020 European Project, <http://www.eubra-bigsea.eu/>.  
Design and implementation of Big Data services on top of a QoS-aware cloud infrastructure. Proposal of innovative technologies, using standards and providing security and privacy, for distributed applications on multiple data models.
- 10/2012–09/2014 **Eco<sub>2</sub>Clouds**, *Experimental Awareness of CO<sub>2</sub> in Federated Cloud Sourcing*, 7th Framework European Project, <http://www.eco2clouds.polimi.it/>.  
Development of methods, guidelines and technology for enriching cloud computing with means to take into proper consideration ecological concerns, such as energy consumption and CO<sub>2</sub> footprint of applications.
- 10/2010–06/2012 **GAMES**, *Green Active Management of Energy in IT Service centres*, 7th Framework European Project, <http://www.green-datacenters.eu/>.  
Monitoring and management of energy efficiency in a data center using adaptive techniques to improve applications efficiency while preserving the quality of service.
- 05/2009–09/2010 **HUMANOBS**, *Humanoids that Learn Socio-Communicative Skills by Observation*, 7th Framework European Project, <http://www.humanobs.org/>.  
Development of new cognitive architectural principles to allow intelligent agents to learn skills by observing and imitating the behaviour of a human demonstrator.

### Participation in National Research Projects

- 04/2014–09/2015 **Attiv@bili**, *Assistenza digitale e innovazione Sociale in Ambienti Controllati*, Bando Smart Cities Regione Lombardia.  
Analysis and evolution of adaptive processes for social and health care addressed to elderly and not self-sufficient people. Analysis and management of monitoring data in an Ambient Intelligence environment.
- 03/2008–09/2008 **VirtusVini**, *Vineyard Monitoring through Wireless Sensor Networks*, Regione Sicilia, <http://www.dicgim.unipa.it/networks/wsn/projects/virtusvini.html>.  
Implementation and management of a wireless sensor network for monitoring environmental features in a vineyard with the aim of enhancing the quality of the production and reducing risks of failures.
- 03/2008–09/2008 **GeoMon**, *Structural Health Monitoring of Historical Heritage Buildings*, Regione Sicilia, <http://www.dicgim.unipa.it/networks/wsn/projects/geomon.html>.  
Design and implementation of an innovative technological framework for monitoring critical structures and geological sites employing a wireless sensor network.

### Research collaborations

- Prof. Eric Elmroth of the **Umeå University**, Sweden: joint research in the field of energy efficiency and performance management of serverless oriented applications. Invited visiting researcher in February 2019 and associate professor between April and December 2019
- Prof. Una-May O'Reilly and Dr. Kalyan Veeramachaneni of the **Massachusetts Institute of Technology**, Cambridge - USA: joint research in the field of machine learning techniques applied to adaptive management of energy efficiency in data centres [J5][C17]. PhD visiting candidate between September 2012 and February 2013.

Milan – 07/04/2020

📄 [vitali.faculty.polimi.it](http://vitali.faculty.polimi.it)

- Prof. Salvatore Gaglio, Dr Massimo Cossentino, and Dr Riccardo Rizzo of the **National Research Council** (ICAR-CNR), Palermo - IT: joint research in the field of evolutionary programming for coordination of multi-agent systems [C22][C24].
- Prof. Antonio Chella and Prof. Haris Dindo of the **Università degli Studi di Palermo**, Palermo - IT: joint research in the field of learning by imitation techniques [C21].

## Organisation and Participation to International Scientific Conferences and Conventions

### List of Organized Conferences and Editorial Roles

- 2020 **Program chair** of the International Workshop on Next Generation Information Systems: Modeling, Monitoring and Management in Cloud and Fog Computing (NeGIS 2020), in conjunction with CAISE'20, June 9 2020, Grenoble, France
- 2020 **Session chair** of The Web Conference (WWW 2020), April 2020, Taipei, Taiwan
- 2019-2020 **Guest Editor** of the Special Issue on Co-design of Data and Computation Management in Fog Computing for the Future Generation Computer Systems Journal (FGCS)
- 2019 **Publicity vice-chair** of the 16th IEEE International Conference on Autonomic Computing (ICAC 2019) and the 13th IEEE International Conference on Self-Adaptive and Self-Organizing Systems (SASO 2019), June 16-20 2019, Umeå, Sweden
- 2016 **Program chair** of the International Workshop on Energy-awareness and Big Data Management in Information Systems (EnBIS2016), in conjunction with CAISE'16, June 14 2016, Ljubljana, Slovenia

### Speaker at International Conferences and Conventions

- 2019 Participation to the International Conference on Service-Oriented Computing (IC-SOC), and **presentation** of the paper "An Adaptive Monitoring Service Exploiting Data Correlations in Fog Computing" [C1], October 28-31 2019, Toulouse, France
- 2018 Participation to the International Conference on Services Computing (SCC), and **presentation** of the paper "Virtual Machine Profiling for Analyzing Resource Usage of Applications" [C3], June 25-30 2018, Seattle, USA
  - **Discussion Session Leader** in the 13th Cloud Control Workshop, June 13-15, 2017, Skövde, Sweden
- 2017 **Discussion Session Leader** in the 11th Cloud Control Workshop, June 12-14, 2017, Haga Slott, Enköping, Sweden
- 2016 Participation to the 2nd IEEE International Smart Cities Conference (ISC2), and **presentation** of the paper "Interconnecting Processes through IoT in a Health-Care Scenario" [C11], September 12-15 2016, Trento, Italy
  - **Invited Speaker** and Participant in the 9th Cloud Control Workshop, June 27-29, 2016, Friberg Herrgård, Sweden

Milan – 07/04/2020

☎ (+39) 02 23993424 • ✉ [monica.vitali@polimi.it](mailto:monica.vitali@polimi.it)

📄 [vitali.faculty.polimi.it](http://vitali.faculty.polimi.it)

- Participation to the 28th International Conference on Advanced Information Systems Engineering (CAISE'16), and **presentation** of the paper "Optimizing Monitorability of Multi-cloud Applications" [C9], June 15-17 2016, Ljubljana, Slovenia
- 2015 Participation to the On The Move federated Conferences and Workshop (OTM'15), and **presentation** of the paper "PiE - Processes in Events: Interconnections in Ambient Assisted Living" [C13] in the EI2N workshop, October 26-30 2015, Rhodes, Greece
- Participation to the 23rd Italian Symposium on Advanced Database Systems (SEBD) and **presentation** of the paper "Managing Energy Efficiency and Quality of Service in Cloud Applications Using a Distributed Monitoring System" [C12], June 14-17 2015, Gaeta, Italy
- 2013 Participation to the international conference on Systems, Man, and Cybernetics, and **presentation** of the paper "Modeling Service Execution on Data Centers for Energy Efficiency and Quality of Service Monitoring" [C17], October 13-16 2013, Manchester, UK
- 2012 Attendance of the DataCentres Europe 2012 industry-oriented conference and **presentation** of a Demo related to the GAMES European project, May 23-24 2012, Nice, France
- Attendance of the 2012 VMware Academic Research Symposium and **presentation** of the poster "Resource Allocation in Virtual Machines for Energy Efficient Data Centers", September 26-27 2012, Cambridge, Massachusetts, USA
- 2011 Participation to the SIGMETRICS international conference and **presentation** of the paper "Usage centric green performance indicators" [C20] at the GreenMetrics Workshop, June 7-11 2011, San Jose, California
- Participation to the international conference on Intelligent Computer Communication and Processing (ICCP) and **presentation** of the paper "Business process co-design for energy-aware adaptation" [C19], August 24-26 2011, Cluj-Napoca, Romania

### Program Committee Service

- 2020 PC member of The Web Conference (WWW)
- 2019-2020 PC member of the International Conference on Distributed Computing Systems (ICDCS)
- 2018-2020 PC member of the IEEE International Conference On Big Data Service And Applications (BDS)
- 2019 PC member of the IEEE International Conference on Advanced Information Systems Engineering (CAISE)
- 2019 PC member of the DaMove Workshop
- 2018-2019 PC member of the International Conference on Service Oriented Computing (ICSOC)
- 2014/2016/2018 PC member of the IEEE International Conference on Systems, Man, and Cybernetics (SMC)
- 2016-2018 PC member of the International Workshop on Energy-Efficient Data Centres (E2DC 2018)

Milan – 07/04/2020

7/14

- 2016-2019 PC member of the IEEE International Conference on Research Challenges in Information Science (RCIS)
- 2017 PC member of the 2017 IEEE International Conference on Smart City Innovations (IEEE SCI)
- 2017 PC member of the 1st IEEE International Workshop on Assured Cloud Computing and QoS aware Big Data (WACC)
- 2016-2020 PC member of the IEEE International Symposium on Computer and Communications (ISCC)
- 2016 PC member of the second IEEE International Smart Cities Conference (ISC2)

### Reviewer Service for International Journals and Conferences

- 2019-2020 Reviewer for the Future Generation Computer Systems (FGCS) Journal
- 2019 Reviewer for the IEEE Transactions on Services Computing (TSC) Journal
- 2019 Reviewer for the Journal of Environmental Management (JEMA)
- 2017/2019 Reviewer for the IEEE Transactions on Network and Service Management (IEEE TNSM) Journal
- 2019 Reviewer for the Energy Efficiency (ENEf) Journal
- 2018 Reviewer for the Complex Systems Informatics and Modeling Quarterly (CSIMQ) Journal
- 2018 Reviewer for the World Review of Science, Technology and Sustainable Development (WRSTSD) Journal
- 2015/2017 Reviewer for the Computing (COMP) International Journal
- 2016 Reviewer for the IEEE International Conference on Networking, Sensing and Control (ICNSC)
- 2016 Reviewer for the Expert Systems with Applications International Journal
- 2016 Reviewer for the IEEE Transactions on Cloud Computing (TCC) Journal
- 2015 Reviewer for the ACM Transactions on the Web (TWEB) International Journal
- 2015 Reviewer for the 23rd International Conference on Cooperative Information Systems (CoopIS2015)

## Teaching Activities

### Lecturer

- AY **Contract Professor**, 30 hours, Digital Technologies, Politecnico di Milano.  
2019/2020 Bachelor Level
- AY **Associate Professor**, 28 hours, Cloud Computing, Umeå University.  
2019/2020 Master Level
- AY **Associate Professor**, 28 hours, Advanced Distributed Systems, Umeå University.  
2019/2020 Master Level

Milan – 07/04/2020

☎ (+39) 02 23993424 • ✉ [monica.vitali@polimi.it](mailto:monica.vitali@polimi.it)  
📄 [vitali.faculty.polimi.it](http://vitali.faculty.polimi.it)

AY **Contract Professor**, 10 hours, PhD Course in Information and Data Quality,  
2018/2019 Politecnico di Milano.  
PhD Level

From AY **Contract Professor**, 30 hours, Information Systems for Computing Engineering,  
2017/2018 to Politecnico di Milano.  
2018/2019 Bachelor Level

From AY **Contract Professor**, 30 hours, Information Systems for Computing Engineering,  
2014/2015 to Politecnico di Milano (COMO).  
2019/2020 Bachelor Level

2017-2019 **Lecturer**, 9 hours per year, BABD - International Master in Business Analytics and  
Big Data, Big Data Cloud Technologies, MIP, Cefriel, and Politecnico di Milano.

2017-2018 **Lecturer**, 8 hours per year, Master in Development of Innovative Software Products,  
Information Systems, Cefriel.

2017 **Lecturer**, 8 hours, UBIS IT MASTER PROGRAM 2016, Fundamentals of computing  
infrastructures and data bases: Computation and data storage in a connected world,  
Cefriel.

### Teaching assistant

From AY **Teaching Assistant**, 20 hours, Information Systems (Prof. Cinzia Cappiello),  
2013/2014 to Politecnico di Milano.  
2018/2019

From AY **Teaching Assistant**, 20 hours, Information Systems for Computing Engineering  
2011/2012 to (Prof. Barbara Pernici), Politecnico di Milano.  
2016/2017

From AY **Teaching Assistant**, from 24 to 40 hours, Foundations of Informatics (Prof. Maris-  
tella Matera), Politecnico di Milano.  
2016/2017

AY **Tutoring**, 22 hours, Information Systems for Computing Engineering, Politecnico di  
2015/2016 Milano.

AY **Tutoring**, 20 hours, Matlab (Scuola di Ingegneria dell'Informazione), Politecnico di  
2011/2012 Milano.

### Thesis Supervision

#### PhD Candidates

2015/2019 **Co-Supervisor**, Xuesong Peng, Monitoring Data Utilization in Fog Computing  
Environments.  
PhD Candidate in Information Technology, Politecnico di Milano

#### Master Level

2018/2019 **Supervisor**, Jia Moxin, Data Reduction in Fog Computing.

### Book Chapters

- [B1] Cinzia Cappiello, Pierluigi Plebani, and Monica Vitali<sup>†</sup>. “A Data Utility Model for Data-intensive Applications in Fog Computing Environments”. In: ed. by Zaigham Mahmood. Vol. 1. Springer, 2018, pp. 183–202.
- [B2] Pierluigi Plebani, David Garcia-Perez, Maya Anderson, David Bermbach, Cinzia Cappiello, Ronen I. Kat, Achilleas Marinakis, Vrettos Moulos, Frank Pallas, Stefan Tai, and Monica Vitali. “Data and Computation Movement in Fog Environments: the DITAS Approach”. In: ed. by Zaigham Mahmood. Vol. 1. Springer, 2018, pp. 249–266.

### Opensource Released Tools

**dcSimulation**, A tool for simulating monitoring data in a data center by managing load rate and defining features of the involved servers and applications, <https://github.com/monicavit164/dcSimulation>.

**StructureLearning**, A tool for learning relations existing between a set of continuous variables represented using a Bayesian Network, <https://github.com/monicavit164/StructureLearning>.

**StructureLearning**, A tool for training and testing an adaptive action selection algorithm for suggesting the best repair action given the state of a set of variables and constraints defined upon them, <https://github.com/monicavit164/ActionSelection>.
