Ph.D. Visiting	
Hosted by: Rafael Lalive	
Centro Studi Luca d’Aglia (Milano, Italy)	Aprile 2019 - Novembre 2019
Research Assistant for Poverty and Development Unit	
Project: <i>“Knowledge heterogeneity: experimental evidence on information barriers to oil seed adoption in Uganda”</i>	
Scientific Supervision by: Jacopo Bonan, Harounan Kazianga, and Mariapia Mendola	
Banca d’Italia (Milano, Italy)	Settembre 2018 - Marzo 2019
Research Assistant for Territorial Economic Research Division	

Project: <i>“Non-traditional financing resources in Lombardia”</i>	
Scientific Supervision by: Massimiliano Rigon, Davide Arnaudo, and Tiziano Ropele	
University of Milano-Bicocca (Milano, Italy)	Marzo 2018
MSc in International Economics	
Evaluation: 110/110 cum Laude	
Thesis: <i>“How does migration affect time allocation of children left behind. Evidence from Colombia”</i>	
Supervisor: Mariapia Mendola	
Universidad del Rosario (Bogota, Colombia)	Settembre 2017 - Dicembre 2017
Scholarship for “Exchange EXTRA-UE Program”	
Data collection and econometric analysis for MSc thesis: <i>“How does migration affect time allocation of children left behind. Evidence from Colombia”</i>	
Supervisor: Juan Miguel Gallego	
University of Milano-Bicocca (Milano, Italy)	Marzo 2015
BSc in Economics and Global Markets	
Thesis: <i>“The international monetary system and the European Single Market in the pages of Il sole 24 ore”.</i>	
Supervisor: Paolo Tedeschi	

ATTIVITÀ PROGETTUALE

Anno	Progetto
2023	Work in Progress: <i>“Illicit Coca Cultivation, Development and Violence: the Case of Fumigations Ban in Colombia. (2023)”</i> Joint with Francesco Campo
2023	Work in Progress: <i>“What do you want to become? Career Aspiration and School Performance. Evidence from a Randomized Field Experiment in Northern Italy.”</i> Joint with Pia Schilling and Steven Stillman
2022	Working Paper: <i>“Are Migrants Rational When Fleeing a Failing State? Evidence from the Venezuelan Crisis.”</i> Abstract: <i>I examine whether potential migrants respond to economic incentives even in a situation where their own country is undergoing a serious crisis and most destination</i>

	<p><i>countries are similarly fragile countries. Specifically, I analyze the exodus of Venezuelans to Colombia, Peru, Chile, and the United States over the 2015-2021 period, relying on individual-level data representative of the Venezuelan population and similar data on Venezuelan migrants residing in the four main destination countries. I find that income differentials and migration costs are robust determinants of Venezuelan migration choice. The discrete choice model reveals that controlling for the wage migration premium, migration costs depend greatly on individual and destination country-specific characteristics. Particularly, women and college graduates face lower migration costs. Moreover, distance to the destination country and pre-crisis network play a key role in migration choice. Finally, my estimates show that the visa requirement imposed by the Peruvian government led to a decrease in the educational level of migrants, suggesting that restrictive migration policies among fragile Southern countries may lead to negative unintended consequences.</i></p> <p>Link per accedere alla versione in PDF</p>
2022	<p>Working Paper: “<i>The Impact of Police Violence on Migration: Evidence from Venezuela.</i>” <i>Joint with Carlo Caporali (R&R at the Journal of Population Economics)</i></p> <p>Abstract: <i>This paper examines the association between the rates of civilians killed by security forces and the likelihood of an individual migrating, drawing on unique georeferenced survey data collected in Venezuela between 2017 and 2018 and providing information on 21,382 Venezuelan citizens. Estimates, which rely on the travel time from the capital city as an instrumental variable, are robust to the inclusion of several households and regional-level characteristics typical of the migration literature, and other types of violence. We find evidence that authoritative violence is a significant non-economic push factor for international migration. Our results also suggest that this type of violence plays a role in shaping the migrants’ skill composition, particularly in the case of South-to-South migration flows.</i></p> <p>Link per accedere alla versione in PDF</p>

CONGRESSI, CONVEGNI E SEMINARI

Data	Titolo	Sede
2022	Labor Economics Seminar	HEC - University of Lausanne
