Descrizione dell'attività

ATTIVITÀ PROGETTUALE

Anno	Progetto
2023	<p>Postdoctoral Researcher on <i>impact of foreign direct investment (FDI) on environment</i> at the Department of Economics and Statistics, University of Salerno, Italy. The methodology used is the Randomized Controlled Trial (RCT):</p> <ul style="list-style-type: none">• Use stratified random sampling to identify the representative sample.• Check the similarity between the control group and the treatment group using the Nearest Neighbor Matching statistical method.• The impact is measured using Caliper matching.• To ensure that the results obtained are robust, I use other methods: the difference-in-differences method and the instrumental variables method.
2022	<p>Postdoctoral Researcher on <i>the determinants of irregular migration in Europe</i> at the Department of Economics and Statistics, University of Salerno, Italy.</p> <ul style="list-style-type: none">• Literature reviews on the origin, arrivals and integration trajectories of irregular migrants in Europe.• Built a micro database of irregular migrants using data of Frontex (the European Border and Coast Guard Agency) and NGO working on the Mediterranean (Proactiva open arms, Sea Watch, Sos Mediteranee and Mission Lifeline).• Estimated irregular border crossings concerning weather factors (precipitation and temperature) and socio-political instability through a dynamic panel model.• Analysed a mediation panel model where agriculture is the mediator, irregular migration the dependent variable and the weather factors independent variables.• The paper is in the process of being published in Journal of the Knowledge Economy.

2021	<p>Consultant on agriculture project at Rural Development Institute, Brandon University of Manitoba, Canada.</p> <p>Worked on the excess moisture event of the 2011 Manitoba flood. The research aims to provide farmers and decision makers knowledge to make and support on-farm investment decisions related to managing times of excess moisture. The research includes four phases:</p> <ul style="list-style-type: none">• Phase 1 selects on-farm strategies to manage excess moisture events; calibrates AquaCrop model to assess the impact of excess moisture on crop yield and farm income.• Phase 2 conducts interviews with farmers and targeted stakeholders and builds a micro database.• Phase 3 validates the findings of the activities in Phase 1 through a simulation of the AquaCrop model.• Phase 4 writes the report.
2019	<p>Marie Sklodowska-Curie Actions Research Fellow on European Union project ALICE (AcceLerate Innovation for Climate changeE) at Northern Ireland Water of Belfast (Northern Ireland, United Kingdom).</p> <p>Wrote a report: Energy efficiency evaluation for urban wastewater management.</p>
2019	<p>Researcher in the Statistics Division at FAO-HQ (Food and Agriculture Organization of the United Nations) in Rome (Italy).</p> <p>Worked on the RuLIS (Rural Livelihood Information System) initiative, the measurement of the Sustainable Development Goals (SDGs) indicators 2.3.1, 2.3.2 and 5.a.1. At FAO Statistics Division, the RuLIS initiative was in partnership with the World Bank and IFAD. RuLIS is 115 indicators and 277 variables on agriculture, from 57 household surveys of 38 countries, for economic analysis.</p>
2018	<p>Marie Sklodowska-Curie Actions Research Fellow on European Union project GRAGE (Grey And Green in Europe) at HAS Den Bosch University, Netherlands.</p> <p>Wrote a report: Economic model to assess environmental policies' impacts on environmental innovation.</p>

TITOLARITÀ DI BREVETTI

Brevetto

CONGRESSI, CONVEGNI E SEMINARI

Data	Titolo	Sede
23-24 September 2022	AIEL (Italian Association of Labour Economics) conference. I presented my paper: "Impact of climate and socio-political instability in West Africa countries on irregular immigration in Europe"	Salerno, Italy
