For the ongoing evaluation of Full Professorship position at the University of Milan, I have selected from the above list of publications, 30 publications (see attached zip files) that I consider representative of my career and scientific achievements. In assembling this list, I considered not only publications where I am first author and/or which had a relevant impact on the scientific community, but also publications where I played a fundamental role as **guide and mentor for PhD students and early career scientists**, as well as **recent publications** that have not yet

accumulated large citation assets but that show where I stand now as far as scientific interests are concerned.
