

SELEZIONE PUBBLICA, PER TITOLI ED ESAMI, A N. 1 POSTO DI TECNOLOGO DI PRIMO LIVELLO, CON RAPPORTO DI LAVORO SUBORDINATO A TEMPO DETERMINATO PRESSO L'UNIVERSITÀ DEGLI STUDI DI MILANO - DIPARTIMENTO DI SCIENZE AGRARIE E AMBIENTALI - PRODUZIONE, TERRITORIO, AGROENERGIA - POLO UNIMONT (EDOLO, BS) - CODICE 22357

La Commissione giudicatrice della selezione, nominata con Determina Direttoriale n. 20325 del 12/12/2023, composta da:

Prof.ssa Sara Panseri	Presidente
Dott.ssa Claudia Vecchiarelli	Componente
Dott.ssa Antonia Bianca Samore'	Componente
Dott. Daniele Guglielmi	Segretario

comunica i quesiti relativi alla prova orale:

GRUPPO DI QUESITI n. 1

Descrivi le principali iniziative che si possono mettere in atto in ambito di formazione match-making anche in collaborazione con partner esterni all'ateneo per aumentare le attività di collaborazione con enti e imprese non-accademici.

What is the impact assessment in a Horizon Europe project for mountain areas rural and social-economic development.

Si legga e traduca il seguente testo estratto da: <https://cordis.europa.eu/project/id/862739>

How mountain areas are being impacted by climate change

European mountain areas play a central role in the well-being of many highly populated European regions. The big question is how these mountain areas are being impacted by climate change. The EU-funded MOVING project will build capacities and co-develop policy frameworks across Europe. It will establish new or upscaled value chains to boost resilience and sustainability of mountain areas. The first step will be to screen traditional and emerging value chains in all European mountain areas. The next step will involve in-depth assessment of vulnerability and resilience of land use, production systems and value chains in 23 mountain regions. The project will use a virtual research environment to promote online interactions amongst actors and new tools to ensure information is accessible by different audiences.

GRUPPO DI QUESITI n. 2

Cosa si intende per living lab, creazione di hub e network specifici nell'ambito dei progetti europei dedicati al comparto montano.

Which are the main axes that you consider as pivotal for mountain areas competitiveness and development?

Si legga e traduca il seguente seguente testo estratto da <https://cordis.europa.eu/project/id/244089/it> :

"The goal of Mountain.TRIP is to provide stakeholders, end-users and practitioners with readily accessible and understandable forms of research-based information relevant to sustainable development in mountain regions.

Mountain.TRIP will start where other EU projects have finished, translating research findings into useful information and developing relationships between users and researchers. EU research projects generally focus on elucidating truths, not on communicating these truths to practitioners or the interested public. Research projects often produce valuable results, methods, tools and instruments, but at the end of the project neither time nor money remains to disseminate these results among practitioners and to the interested public. Furthermore, research results usually exist in forms recognized by the research community but not easily or quickly assimilated by communities of practice.

Mountain.TRIP will close the gap that currently exists between EU project findings and the needs of policy-and decision-makers, stakeholders in economy and environment, planners and administrators, non

governmental organisations, end-users, and other members of groups representing the interests of citizens and industry of the most important mountain regions of Europe, hereafter referred to in this proposal as ""practitioners"".

Mountain.TRIP will not just disseminate research results but will rather synthesize results from multiple EU projects while adapting the format of that synthesis through continuous interaction with practitioners to meet their needs. The project uses multiple innovative mechanisms to ensure effective interaction with practitioners."
