

# UNIVERSITÀ DEGLI STUDI DI MILANO

TO MAGNIFICO RETTORE OF UNIVERSITA' DEGLI STUDI DI MILANO

ID CODE 6648

I the undersigned asks to participate in the public selection, for qualifications and examinations, for the awarding of a type B fellowship at Dipartimento di Filosofia Piero Martinetti

Scientist- in - charge: HYKEL HOSNI

## CURRICULUM VITAE

### PERSONAL INFORMATION

Surname	RAMIREZ ABARCA
Name	ALDO IVAN

### PRESENT OCCUPATION

Appointment	Structure
SENIOR DATA SCIENTIST, PROJECT MANAGER	WIZELINE INC

### EDUCATION AND TRAINING

Degree	Course of studies	University	year of achievement of the degree
Degree	MATHEMATICS	UNIVERSIDAD NACIONAL AUTONOMA DE MEXICO (UNAM)	2012
Specialization	TOPOLOGY	UNIVERSIDAD NACIONAL AUTONOMA DE MEXICO (UNAM)	2012
PhD	LOGIC	UTRECHT UNIVERSITY	2023
Master	LOGIC	UNIVERSITY OF AMSTERDAM	2015
Degree of medical specialization			
Degree of European specialization			

Other			
-------	--	--	--

## REGISTRATION IN PROFESSIONAL ASSOCIATIONS

Date of registration	Association	City

## FOREIGN LANGUAGES

Languages	level of knowledge
ENGLISH	FLUENT
SPANISH	NATIVE

## AWARDS, ACKNOWLEDGEMENTS, SCHOLARSHIPS

Year	Description of award

## TRAINING OR RESEARCH ACTIVITY

ERC-funded project “Responsible Intelligent Systems,” led by Dr. Jan Broersen. The project aimed at the automation of responsibility-checking in AI. The idea was to create and implement logics of responsibility, tailored to the demand of harnessing automated/autonomous/intelligent decision-making in cases where decisions have ethical implications.

I developed agent models and proof systems relevant in the design and verification of explainable ethical AI. At the level of design, the models can be used to interpret and explain opaque sub-symbolic AI's. At the level of verification, the models, resp. proof systems, can be used to perform model checking, resp. automated theorem-proving.

I led a sub-project whose goal was to test hybrid AI (with sub-symbolic learning and symbolic verification). The sub-project aimed at (1) interpreting the decisions of a deep neural network as formulas of a logic-based formalism, (2) representing graded responsibilities in such a formalism, and (3) building translations into formulas of alternating-time temporal logic, to be checked by model checkers.

## PROJECT ACTIVITY

Year	Project
2016-2023	ERC-funded project “Responsible Intelligent Systems”

## PATENTS

Patent

## CONGRESSES AND SEMINARS

Date	Title	Place
2023	TARK 2023	Oxford, United Kingdom
2022	DaLí workshop 2022.	Online
2021	TARK 2021	Online
2019	DaLí workshop 2019.	Porto, Portugal
2019	JELIA 2019	Rende, Italy
2019	REINS conference	Utrecht, The Netherlands
2018	AAMAS 2018	Stockholm, Sweden
2018	DEON 2018	Utrecht, The Netherlands
2017	Current Trend in Deontic Logic 2017	Slovakia, Bratislava
